Riders Insight

Efficient climber, gripping well at the same time transferring power into satisfying forward movement.I found the playful side of the bike in there somewhere, all be it at slightly higher speeds, and the planted nature of the bike brought with it advantages as well.**IMBIKEMAG.COM**The META was great fun to chuck around on tight, steep, techy trails and the 65° head angle is bang on the money It's totally at home on hard packed, surfaced trails and loves slashing berms on the red and blue graded loops. As a trail centre bike, the META is cracking.**WIDEOPEN UK MOUNTAIN BIKING**Especially on steep terrain, the silver hardtail from Andorra is trustworthy and offers a lot of confidence thanks to its excellent geometry (...) it is very agile and loves being in the air!**MTB NEWS**

SPOKE LENGTH

WHEEL	NON DRIVE SIDE / LEFT	DRIVE SIDE / RIGHT
FRONT	273 mm	274 mm
REAR	274 mm	272 mm
