Riders insight

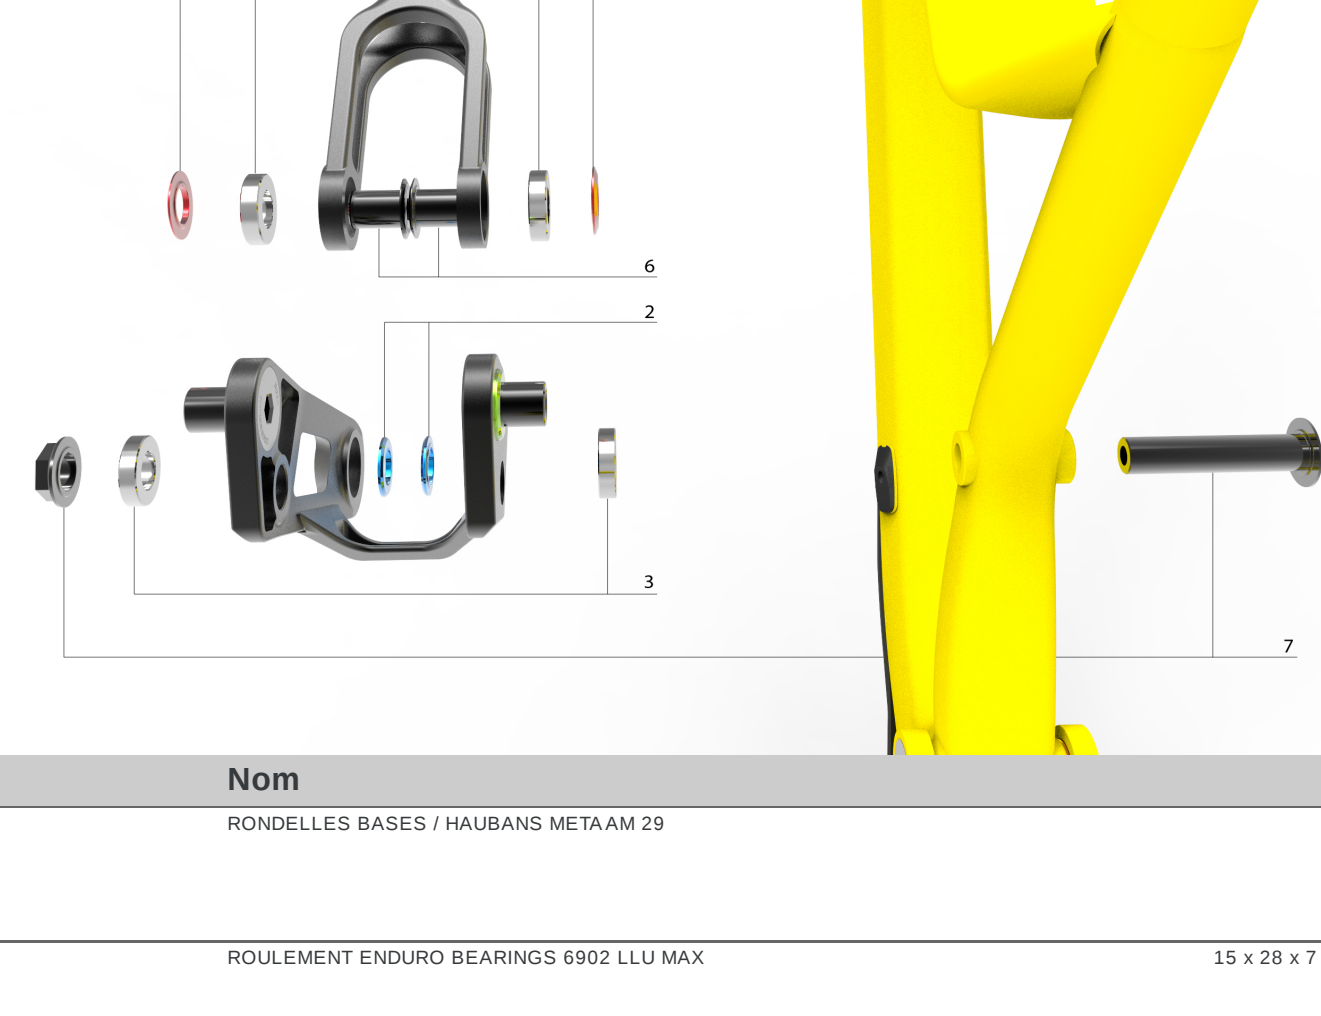

The COMMENCAL climbs well, above all thanks to the balanced seating position / The bike will compensate for any lack of riding technique / The componentry left nothing to desire **ENDURO MTB**Excellent parts spec for the price / Excels on rough, steep terrain / If the Meta's short back end fits the overall manners of the bike very well, keeping it quick in the corners, and facilitating rapid direction changes**PINKBIKE**A bike to ride hard! // Compact is the first word that comes to mind. Almost unheard of for a 29er! // The META AM 29 inspires confidence, reliability and strength... In short, stiffness is here!**ENDUROTRIBET**The composed ride gives extra confidence when things turn more technical and steep. It's certainly not a bike that's scared of tight corners. I can confidently say I've never ridden a bike so fast**BIKE RADAR**I asked to sum up the Meta AM 29 in one word, "balanced" would be a good choice. "Ready for anything" would be another way to describe it. We were impressed with just how easily such a big bike was able to deal with several long and steep climbs. Whether carving turns or getting off the brakes down a rock-strewn single, we found the new bike fun and easy to ride **VITAL MTB**The META AM 29 made me discover new things! Behind the handlebars, I am in control, all the while maintaining grip, the same as through rough sections. No questions asked. Everything is easier with this bike. I really love it and since my injury, I miss it...**Cécile Ravanelle**I asked to sum up the Meta AM 29 in one word, "balanced" would be a good choice. "Ready for anything" would be another way to describe it / We were impressed with just how easily such a big bike was able to deal with several long and steep climbs / Whether carving turns or getting off the brakes down a rock-strewn single, we found the new bike fun and easy to ride **VITAL MTB**
