Riders Insight

The COMMENCAL climbs well, above all thanks to the balanced seating position / The bike will compensate for any lack of riding technique. / The componentry left nothing to desire **ENDURO MTB** Excellent parts spec for the price. // Excels on rough, steep terrain. // The Meta's short back end fit the overall manners of the bike very well, keeping it quick in the corners, and facilitating rapid direction changes **PINKBIKEA** bike to ride hard! // Compact is the first word that comes to mind. Almost unheard of for a 29er! // The META AM 29 inspires confidence, reliability and strength... In short, stiffness is here! **ENDUROTRIBET** the composed ride gives extra confidence when things turn more technical and steep. It's certainly not a bike that's scared of light corners. I can confidently say I've never ridden a bike so fast **BIKE RADAR!** If asked to sum up the Meta AM 29 in one word, "balanced" would be a good choice. "Ready for anything" would be another way to describe it. We were impressed with just how easily such a big bike was able to deal with several long and steep climbs. Whether carving turns or getting off the brakes down a rock-drawn single, we found the new bike fun and easy to ride **VITAL MTB!** The META AM 29 made me discover new things! Behind the handlebars, I am in control, all the while maintaining grip, the same as through rough sections. No questions asked. Everything is easier with this bike. I really love it and since my injury, I miss it... **Cécile Ravanel** Since I've been using it I've had a hard time going back to using conventional transmission. **ANTOINE VIDAL** I can make my own choices and transmission settings via the SRAM AXS bluetooth app **ANTOINE VIDAL**. This system has become indispensable for enduro and I really want to be able to use it for DH too! **ANTOINE VIDAL** The META AM 29 made me discover new things! Behind the handlebars, I am in control, all the while maintaining grip, the same as through rough sections. No questions asked. Everything is easier with this bike. I really love it and since my injury, I miss it. **Cécile RAVANEL**
